ÖZET
Bu araştırmanın amacı, Friedrich Nietzsche'nin "Güç İstenci" adlı kitabının analizi yapılarak gücün kaynağının etik ilkeler açısından incelenmesidir. Güç yüzyıllardır birçok felsefeci tarafından tanımlanmaya çalışılmıştır. Felsefenin temel ve en eski disiplinlerinden olan etik de aynı şekilde MÖ'den beri önemli bir çalışma alanıdır. Ele alınan kitabın tasarımında genel olarak güce ulaşma kavramı yer almaktadır. Friedrich Nietzsche'de güç hep var olan ve olması gereken gerçek güç olarak sınıflanabilir. Her canlıda doğuştan gelen bir güç istenci vardır. Kişi kendini korumak için, başkaları üzerinde baskı kurarak güç elde etmek için ve hatta birilerine yardım ederken dahi egosunu ve gücünü ispat etmek isteyebilir. Ancak kişi kendi hırslarından ve başkaları üzerinde güç kurmaktan uzaklaşıp tüm bu duygularından kendini arındırarak kendini özgürleştirebilirse, önyargılarından ve şahsi yorumlarından ayrılabilirse işte o zaman değerlere yönelerek kendini doğru anlamda insan olarak güçlü kılabilir. Gerçek güç var olan kötülüklerden uzaklaşabilen bir ruha sahip olmaktır. Bu durumda da güç ve etik kavramları bir araya gelir. Etikteki doğru yanlış iyi kötü kavramları güç açısından insanın kendi egosundan özgürleşmesiyle değerlere yönelmesiyle iyiliğe geçmesiyle açıklanabilir.
Bu çalışma kapsamında güç ve etik bir araya getirilmiştir. Çalışmada "etik ilkeler" ölçüt alınarak, etik ilkelere ilişkin saptamalara değinilmiştir. Araştırma nitel araştırma olarak tasarlanmıştır. Metinden içerik analizi nitel araştırma kapsamında yapılmıştır. Analiz sonucunda ortaya çıkan temalar tekrar kitaptan örnek cümleler alınarak desteklenmiştir. Yapılan analizin sonucunda bulgular elde edilmiştir. Gücün kaynağı olarak etik ilkeler incelendiğinde duyarlılık, saygı ve olumlu insan ilişkileri, eşitlik, dürüstlük ve doğruluk, güvenirlik, sevgi ve hoşgörü, alçakgönüllülük, adaletli olmak, demokrasi, değer vermek, hümanizm, yardımseverlik ve hak ve özgürlükler karşımıza çıkmaktadır. Özellikle hümanizm ve adalet kavramları ön plandadır. Gücün temelinde etik ilkelerin yer alması gücün doğru kullanılmasına zemin hazırlar. Etik ilkelere bireyler ve toplum tarafından gereken önem verilmeli ve bu ilkeler her zaman kullanılmalıdır.

AN ANALYSIS OF FRIEDRICH NIETZSCHE'S THE WILL TO POWER IN TERMS OF ETHICAL PRINCIPLES

ABSTRACT
The aim of this research is to analyze the source of power in terms of ethical principles by analyzing Friedrich Nietzsche's book "The Will to Power". Power has been described by many philosophers for centuries. Ethics, one of the basic and oldest disciplines of philosophy, has likewise been an important field of study since BC.

The concept of reaching power is generally included in the design of the book. In Friedrich Nietzsche, power can be classified as real power that has always existed and should be. Every living thing has an innate will to power. The person may want to prove his ego and strength in order to protect himself, to gain power by putting pressure on others, and even while helping someone. However, if a person can get away from his own ambitions and power over others and free himself by purifying himself from all these feelings, if he can separate from his prejudices and personal interpretations, then he can make himself strong as a human being in the right sense by turning to values. The real power is to have a soul that can turn away from the evil that exists. In this case, the concepts of power and ethics come together. The concepts of right, wrong, good and bad in ethics can be explained in terms of power, by liberating one's own ego, turning to values, and becoming good.

Power and ethics are brought together in this study. In the study, "ethical principles" were taken as a criterion and determinations related to ethical principles were mentioned. The research was designed as a qualitative research. Within the scope of qualitative research, content analysis was made from the text. The themes obtained through the analysis were also supported by quoting sample sentences from the book. As a result of the analysis, the findings were reached. When ethical principles are examined as the source of power, we encounter sensitivity, respect and positive human relations, equality, honesty and truthfulness, reliability, love and tolerance, humility, being just, democracy, valuing, humanism, helpfulness and rights and freedoms. In particular, the concepts of humanism and justice are at the forefront. Ethical principles are the basis of power, and it lays the groundwork for the correct use of power. Ethical principles should be given due importance by individuals and society, and these principles should always be used.

1.GİRİŞ

İnsanoğlunun yaşam mücadelesinin özü bir güç sistemidir. İnsanlıkta dâhil olmak üzere her canlı güç için yaşar ve yok olur. Tüm canlılar yaptıkları bütün eylemleri kendilerini korumak için değil; var olandan daha fazlası olmak için yapar. Yaşamın devamlılığı için güç istemi olmalıdır. İnsan her zaman daha fazlasını olmayı isteyen bir varlıktır ve her zaman güce ulaşmayı ister. Bu güç istenci; uzun süreçte işine yarayan toplum içerisinde saygı ve itibar kazanmasını teşvik eden bir güç istencidir. Güç istenci insanın aklına ilk geleni yapması değil; onu daha güçlü hale getirmesini sağlayacak olan şeyi bulup uygulaması olarak ifade edilir.

Kavram olarak güç; doğa bilimleri ve sosyal bilimler gibi birçok bilim dalı ile birbirinin içine geçmiş durumdadır. Her bir alan için farklı tanımları vardır. Tanımlar bilim adamları ve düşünürlere bağlı olarak farklılık göstermektedir. Güç; her birinin gözlemlerine ve alanlarına göre farklı şekillerde tanımlanmıştır.

Güç konusu temelde Sokrates'e kadar dayanmaktadır. Sokrates için güç insanların kendilerini canlandıran bilgidir (Cevizci, 2017, s. 63). Gücün temelini atan Platon'a göre ise önemli olan gücün nereden alındığıdır (Platon, 2010, s. 473). Aristo'nun tanımına göre güç üstünlüğe ve yeteneğe sahibi olmaktır; Machiavelli için ise güç stratejidir (Aristotales, 1975, s. 210; Machiavelli, 1981, s. 49). Nietzsche ahlakı güçlü olanın karakterinin de güçlü olduğuna inanmaktadır (Nietzsche, 2017, s. 143). Foucault için güç gerçek ile ilişkilidir; Weber gücü, direnmeye karşı istenilenin gerçekleşmesi olarak tanımlamaktadır; Locke gücü ilahi güç olarak tanımlar (Foucault, 1976, s. 45; Weber, 2005, s. 28; Cevizci, 2017, s. 600). Rousseau (2016, s. 33-34) gücü, güç sahibi olanın her zaman hak sahibi olması olarak tanımlamıştır. Kant'a göre güç yasa koyuculardadır; Burke'ye göre de güç akıldır (Cevizci, 2017, s. 757; Cevizci, 2017, s. 789).

Etik, felsefenin temel ve en eski disiplinlerindendir. Ahlaklılığı çözüme ulaştıran, ahlaki kavram ve yargıların içeriğini tartışan, ahlak üzerinde sistemli bir şekilde düşünerek zaman harcayan, sorgulayan, kendine değer dünyasını konu alan, içeriğinde hayata anlam katan her şeyi barındıran düşünme biçimi ve ahlaki ilkeler teorisi olarak belirtilmektedir (Cevizci, 2008, s. 3). Eylemlerin insan ilişkilerinde ne tür unsurlardan oluştuğunu ve ne tür belirleyicilerle ilgili olduğunu inceleyen etik, felsefenin bir dalıdır (Kuçuradi, 2017, s. 41). Etik, insanların arasındaki ilişkilerde değer ile ilgili problemleri konu alan etiktir. Etiğin sağladığı bilgiler insanca yaşayabilmeyi sağlamıştır. Etik ile ilgili birçok tanım vardır. Yaşadığımız sürede kendimize ve diğer insanlara sorduğumuz "iyi mi?" ya da "doğru mu?" şeklindeki sorular her çağda karşımıza çıkmaktadır (Güngör-Kıranlı ve Atalay, 2018, s. 1753).

Etik, belirlenmiş kuralları ve davranışları ortaya çıkararak örgütleri, grupları ve bireyleri güçlü bir biçimde etkileyen ilkelerin tamamı olarak tanımlanır. Etiğin çalışma alanına bakıldığında insanların doğruları ya da yanlışları ile ilgili olduğu görülmektedir. Etik, değere benzetilir. Etik düşüncelerin ne olduğu değil ne olması gerektiği önemli taşımaktadır (Thompson, 1985, s. 555). Bununla birlikte; etik bir grubun etkileri, kültürü ya da özel bir toplum tarafından tespit edilmiş kabul edilebilen doğru kalıplarla ilgilenmektedir. Sonuçta; doğruluk ve yanlışlık gibi kavramlar bir koşulda belirli olan kalıpları ya da ilkeleri göstermektedir ve tanımlamaktadır (Peach ve Reddick, 1986, s. 1). Etik, toplumsal oluşumları araştırarak, olması gerekeni ve olması istenileni tespit etmeyi ilke olarak görmektedir (İskele, 2009, s. 7). İyi-kötü ya da doğru yanlış gibi konular etik ile açıklanır. Doğru ve yanlışın çalışma alanı etik belirli bir çevre içerisindedir. Etiğin yer aldığı içerik; sınırların, tanımların ve görüşlerin meydana gelmesi için kullanılmaktadır (Hatcher, 2004, s. 357).

Etik ilkeler, tartışma oluşturacak açık eylem ve kararlardan uzakta yer almayı, doğru olmayıp çekici görünen yaklaşımlardan uzakta durmayı sağlar. Etik ilkeler, kişilerin etik davranmasını teşvik eden, onların kötü işlere yakın olmamasını sağlayan bir yol göstericidir. Bununla birlikte karar verme süreci boyunca bireylerin etik karar vermesini sağlayan önemli bir unsurdur. Uyulması gerekli olan etik ilkeler adalet, eşitlik, dürüstlük ve doğruluk, tarafsızlık, sorumluluk, insan hakları, hümanizm, bağlılık, hukukun üstünlüğü, sevgi, hoşgörü, saygı, tutumluluk, demokrasi, olumlu insan ilişkileri, açıklık, hak ve özgürlükler, emeğin hakkını verme, yasa dışı emirlere karşı direnmedir (Aydın, 2001, s. 3).

Etik ilkelerden adalet ilkesi toplum içerisinde aynı koşullarda olan insanların özgürce yaşayabilmesi için hak ve sorumlulukların ortak paylaşılmasını anlatır. Eşitlik; fayda ve hizmetin paylaştırılmasında dikkat edilecek sınırları gösterir. Tarafsızlık; belirli tutum ve düşüncelerden etkilenmemektir. Dürüstlük ve doğruluk; iletişimde diğer bireyler arasındaki samimiyeti içerir. Sorumluluk; hesap verebilme ve doğacakları göze alabilmedir. Bağlılık; bireylerin çalışma ortamındaki varlıklarını devam ettirebilmeleridir. Hümanizm; bireyin erdem ilkeleri çerçevesinde yetiştirilebilmesidir. İnsan hakları; dokunulamayan ve aktarılamayan haklardır. Sevgi ve hoşgörü; yasalara ve etik kurallara aykırı olmayacak şekilde durumlara tahammül edebilmektir. Tutumluluk; maddi kaynakları en iyi şekilde kullanabilmektir. Demokrasi; halkın hür iradesi ile kendi kendini yönetmesidir. Saygı ve olumlu insan ilişkileri; bireyi olduğu gibi kabul etmektir. Açıklık; eleştiriye açık olup objektif olmaktır. Hak ve özgürlükler; bireyin kendi kararlarına uygun şekilde davranmasıdır. Yasa dışı emirlere karşı direnme; hukuki anlamda suç oluşturacak davranış ve eylemlerden kaçınmaktır (Aydın, 2001, s. 8)

2. ÇALIŞMANIN AMACI VE YÖNTEMİ

Bu araştırmanın amacı, Friedrich Nietzsche'nin "Güç İstenci" adlı kitabının analizi yapılarak gücün kaynağının etik ilkeler açısından incelenmesidir. Bu çalışmada güç ve etik bir araya getirilmiştir.

Bu araştırmada nitel araştırma yöntemi kullanılmıştır. Gerçek ortamda çoklu yöntemleri kullanan nitel araştırma, tümevarım ve tümdengelim sürecinde gidip gelen karmaşık karşılaştırma süreçlerini kapsayan, katılan kişilerin bakış açılarına, yorumlarına ve çoklu görüşlerine odaklanan bütüncül bir araştırma türü olarak tanımlanmaktadır (Creswell, 2016, s. 46). Nitel araştırmanın, çoğunlukla her aşamasında oluşan durumlara göre yeniliklere açık olduğu görülmektedir. Nitel araştırma yöntemi, algıların ve olayların kendi ortamında gerçek ve bütün olarak ortaya konulduğu bir araştırma şeklinde ifade edilebilir. Ayrıntılı tasvirlerin yer aldığı bir araştırma şeklidir. Keşfedici olması nitel araştırmanın bir diğer özelliğidir (Neuman, 2017). Metinden içerik analizi veri analizi olarak kullanılmıştır.

Araştırmada Friedrich Nietzsche'nin "Güç İstenci" adlı kitabı kullanılmıştır. Kitaptaki metinler veri kaynağıdır. Araştırmada genel olarak "Güç İstenci" kavramının Friedrich Nietzsche tarafından evrende yer alan her şeyin temelinde yer alan istenç olarak tanımlandığı görülmektedir. Mikroyu ve makroyu çevreleyen bu kavram, dönüşümlerin ve değişimlerin temel kaynağı olarak görülmektedir. Kitapta yer alan her detayda bahsedilen istencin izleriyle karşılaşmak mümkündür. Nietzsche'ye göre insanın doğası güç istencinin ortaya çıkma biçimidir. Meydana gelen hareketler ve eylemler güç istencinin aşama sırasına göre üstünlük kurma biçiminden oluşmaktadır. Analiz aşamasında etik ilkeler açısından elde edilen temalar ve temalara ilişkin cümle alıntılarına yer verilmiştir.

4. SONUÇLAR VE ÖNERİLER

Nietzsche'ye göre gücün kaynağı etik ilkelerle ilişkilidir. Ahlaklı, adaletli, saygılı olan; duyarlılık sahibi, herkese eşit davranan, yardımsever, değer veren, alçakgönüllü, hoşgörülü, ilkeli, dürüst ve doğru ve güvenilir olanların güç sahibi olduğunu söylemek mümkündür. Kitapta en fazla ahlaklı olmanın insanı güçlü kıldığı üzerinde durulmaktadır. Yaşama gücünü ve yaşam mücadelesi için insan kendi içindeki gücü kullanmalıdır. Bu gücü oluşturan şey de ahlaklı olmaktır. Diğer üzerinde durulan güç kaynağı da adaletli olmaktır. Etik ilkelere önem veren bu kitap toplumda sürekli dikkat edilmesi gereken gücün kullanımı konusuna dikkat çekmektedir.

Etik ilkeler toplumun bütün üyelerine saygılı davranmayı, farklı kültürlere ve düşüncelere karşı hoşgörülü olmayı, kişilerin eşitliğinin kabul edilmesini, adaletli davranmayı ve değerlere önem verilmesini sağlar. Bu ilkeler yol göstericidir. Gücün temelinde etik ilkelerin yer alması gücün doğru kullanılmasına zemin hazırlar ve kişilere liderlik rolü kazandırır. Etik ilkelere toplumda ve kurumlarda bireyler tarafından gereken önem verilmeli ve uygulanmalıdır.
